

MW ARCHITECTS

COMMERCIAL OFFICE RESUME

FIRM BACKGROUND

Founded in 2002, MW Architects is a client-friendly, full-service architectural studio led by architects Michael Peachey and Wayne Stuart. Combined, they bring over 50 years of experience in all aspects of the design and development process including: schematic design, team building, project development and approval, budgeting and cost negotiations, and contractor coordination. Michael and Wayne have worked together as a team since 1998.

FIRM PHILOSOPHY

- **Arming Our Clients with Powerful Professional Resources** - Our approach is collaborative, building a team of experts which includes the client. We bring a highly experienced consultant team together to provide the owner with expert advice on all aspects of their project. Along with these consultants MWA seeks to involve the contractor early in the process to further give the client valuable information.
- **Personalizing the Design Process** - Rather than approach each individual project with a single theory or concept, MWA listens to the whole team to give the client direction in making the most informed choice. They lead each client through every phase of design and construction, from napkin sketch to finishing touches.
- **Creating Projects that Add Value** - It is not enough for us to create outstanding architecture. At the end of the project we strive for a product that is both attractive and within budget that the client is pleased with. MWA is committed to designing buildings that incorporate resource efficiency, energy efficiency, and healthy environments. They have included the following strategies in their designs; Passive and active solar space heating, solar heating of domestic hot water, energy crafted building envelopes, high efficiency appliances, water saving devices, improved indoor air quality via healthy building materials, superior venting and ventilation systems, use of local resources, and preservation or restoration of landscapes.

THE “M” & “W”

Michael C. Peachey | Principal Architect

Michael's exposure to world architecture started at a young age, while traveling the globe with his father who served in the Air Force. During high school, his Grandfather, a Building Inspector, provided the impetus to explore the world of architecture. Michael worked in the construction trades as a concrete laborer, roofer and framing contractor. His ventures eventually led him to Cal Poly San Luis Obispo in 1979, where he entered the five-year architectural program. Prior to his fourth year, he received a full scholarship to study in Europe at the Ecoles D' Art Program in Fontainebleau, France. Through the years, design excellence and technical competence on many differing projects has expanded Michael's reach and resulted many award-winning projects, notably the Hotel Cheval in Paso Robles.

Wayne R. Stuart | Principal Architect

Wayne brings years of practical experience to the project team, having worked extensively in many areas of building technology. After completing college, he began employment in the construction field, concurrently seeking an opening in the architectural field. Subsequent to securing a job with an architect that offered both architectural and construction services, he gained extensive experience in both fields. From these varied experiences and personal gifts in leadership, management, and organization, along with his love for the technical side of architecture, Wayne is committed to quality, not merely getting plans through requisite processes.

THE TEAM

MW Architects' staff family is a group of diverse individuals with a variety of gifts and experiences coming together under the leadership of Mike and Wayne to form a cohesive and effective team. This team offers the direct availability and personal relationship focus of a small business while harnessing the latest technologies to work quickly and efficiently on any scale.

C.J. Horstman | Architect – A 2013 Cal Poly Grad focused on programming, entitlements, design and visualization.

Derrick Carter | Project Manager- A computer programming guru with over 25 years of industry experience delivering residential, commercial and industrial projects from S-XL.

Catheline Goodman | Designer – A detail-oriented 2008 Cal Poly Grad & LEED AP who works across design, construction drawings and construction administration.

Drew Van De Vanter| Draftsman- A Central Coast native and Cuesta College Graduate with years of experience working in the construction industry.

SELECT EXPERIENCE- INDUSTRIAL PROJECTS

Family Care Network Headquarters – San Luis Obispo

26,000 square foot office building which included a 3,500 SF meeting room. Our office worked closely with developing a program to take their existing 15,000 square foot facility and grow into this new ground up building located in new commercial subdivision in San Luis Obispo.

Airpark Office Park – Santa Maria, CA

Two 25,000 SF, two story office buildings designed for high tech businesses. Building A was constructed in 2017 and we worked on the 2 tenant improvement projects for MindBody and DCCA.

Parkway Medical Center – Santa Maria

A 3-story 30,000 sq. ft. medical office building. The two outdoor plazas provided outdoor areas for enjoying lunch and snacks at the kiosk developed on the southern exposure, with the building blocking the prevailing winds of Santa Maria. In addition to the 3 story shell building, our office was instrumental in developing the majority of the doctor's tenant improvements.

Tank Farm Office Park– San Luis Obispo

5-acre campus with two 2-story buildings, one 59,000 sq. ft. building and one 32,000 sf. building. All buildings were designed as shell spec and each building provided two main entry points with secondary entrances that incorporated outdoor meeting and patio space for building tenants. Each building was interconnected with decorative paths to the adjacent deli and patios. The building shell provided common restrooms and showers with ample bicycle storage for commuters. Outdoor spaces were developed to screen the prevailing winds and to take advantage of solar orientation for comfort and efficiency.

IQMS Headquarters – Paso Robles

A 29,000 square foot pre-engineered metal office building. Tenant improvements included multiple phases to allow for growth over 5 years. Received 2007 Best of Category for metal buildings.

Rosetta Headquarters – San Luis Obispo

46,000 square foot 2 story office facility that was designed for younger generation and has a much more casual feel to it. MWA worked with developer to provide a building for a specialized tenant with the ability to re-tenant building for multi-tenants when current lease ends.
